

Neighborhood in Focus:

O'Fallon

Hello O'Fallon Neighborhood Resident:

As part of PIER (Prevention, Intervention, Enforcement, and Re-Entry), the City's Comprehensive Crime Plan, we are focusing efforts on 15 neighborhoods – O'Fallon Neighborhood– is one of them. The following pages contain graphics focusing on health data to help move conversations away from emotion and ground them in facts. This “Neighborhood In Focus” also highlights health needs identified in the O'Fallon Neighborhood and available resources to help meet those needs.

Crime is influenced by many factors in the community. The Center for Disease Control has identified some aspects of crime -- such as violence -- as a public health concern. This calls for a public health response.

O'Fallon Neighborhood has a lot of positive attributes that have formed its history and will help us to provide the basis for an even better future. We hope you will be able to use this “Neighborhood In Focus” guide for your neighborhood improvement discussions. Let us know what you think.

Sincerely,

Melba R. Moore, MS, CPHA
Acting Director / Commissioner of Health

Disclaimer: Information in this guide is meant to inform the public about health indicators in the community. Selection of data is limited to indicators available for abstraction by neighborhood level or zip code level. Neighborhood rankings are based on rates of respective indicator. Data sources include Centers for Disease Control (CDC), Census (2010), Missouri Department of Health and Senior Services (MDHSS), Behavioral Risk Factor Surveillance System (BRFSS), Missouri Department of Motor Vehicles (DMV), CityWorks, and Understanding Our Needs (UON) 2016.

Neighborhood Map: O'Fallon

A PUBLIC HEALTH PROBLEM

Access to nutritious food is a challenge: 55% of St. Louis city is considered a food desert.

About 1 in 5 Americans meet national physical activity guidelines.

Adult Americans spend a significant amount of their day at work, and many struggle to be physically active.

YOUR NEIGHBORHOOD

Overweight & Obesity Prevalence

Overweight & Obesity

IN THE CITY OF ST. LOUIS

Compared with other St. Louis neighborhoods, O'Fallon ranks 9th highest for overweight & obesity rates.

A PUBLIC HEALTH SOLUTION

Public health improves food safety and food choices. For tips on making better choices: check out Small Changes for Health.

Public health creates opportunities to be physically active. Check out Let's Move!

Create or enhance physical activity environments to be safe and pedestrian friendly. Check out the Sustainable Neighborhood toolkit.

THE PROBLEM

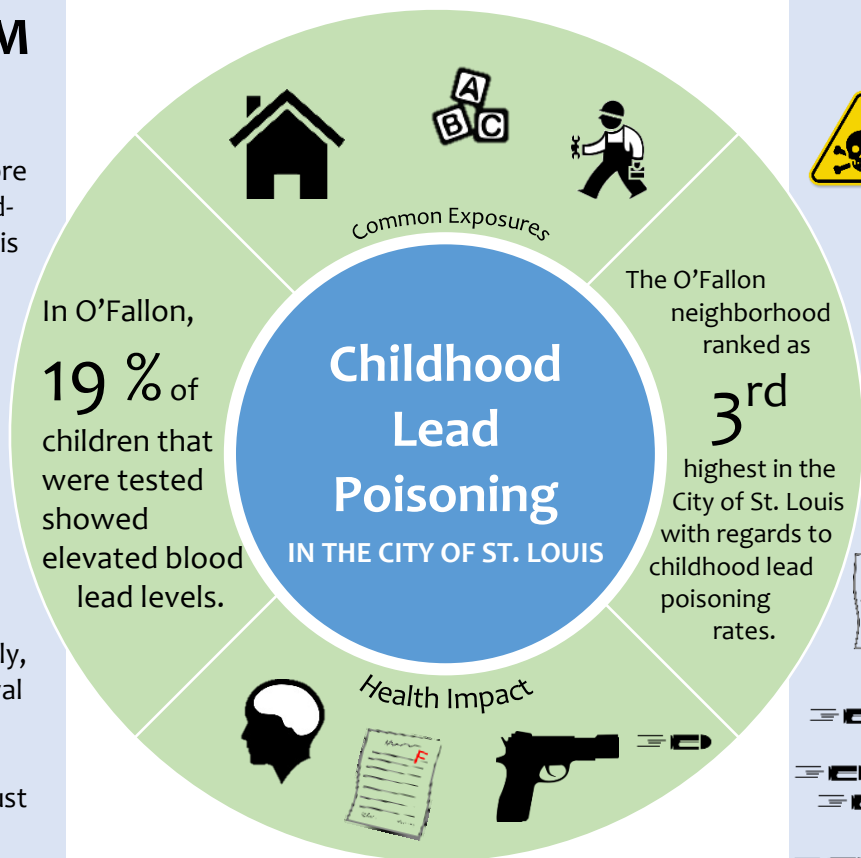

Many St. Louis homes built before 1978 contain lead-based paint that is deteriorating.

Small amounts of lead dust or chipped paint can be enough to cause lead poisoning.

If done incorrectly, lead paint removal can expose the lead and cause contaminated dust to be airborne.

THE IMPACT

Lead can be ingested, inhaled, or absorbed through the skin, causing lead poisoning.

Lead poisoning causes damage to the brain, causing learning disorders, hearing problems, and slow growth.

Lead-exposed children may perform poorly in schools and tend to drop out.

A growing body of evidence in the social and medical sciences traces high crime rates to high rates of lead exposure.

*Source: MDHSS, 2014.

What the City of St. Louis Department of Health Can Do

We offer free blood lead level testing for your child.

We provide education on nutrition and cleaning techniques that can reduce lead exposure.

We offer free water testing for your home's plumbing.

What You Can Do

Get tested.

Talk with your child's doctor about a simple blood lead test.

Check your home.

Talk with us about testing paint and dust in your home for lead.

Remove the threat.

Discard any items in the house that may contain lead.

Renovate safely.

Use contractors certified by the EPA to prevent hazardous lead dust.

THE PROBLEM

The St. Louis metropolitan area consistently has rates of violence far higher than most other places in the United States – ranking 9th in the nation for number of youth murdered with guns in 2012.

O'FALLON

4 in 100 residents experienced a burglary, larceny, or vehicle theft.

2 in 100 residents was the victim of a violent crime.

4 in 1000 crimes reported involved drugs.

The health impact of CRIME IN THE CITY OF ST. LOUIS

Compared with 79 City of St. Louis neighborhoods, O'Fallon ranked:

- 60th highest for property crime rates
- 39th highest for violent crime rates
- 46th highest for drug-related crime rates

HEALTH IMPACT

Violence is a serious public health problem. It affects people in all stages of life. Those who survive violence suffer physical, mental, and or emotional health problems throughout the rest of their lives.

VIOLENCE

- Violence is the leading cause of injury, disability, and premature death.
- Youth violence is the 3rd leading cause of death for young people (15-24 years).
- It also affects the health of communities.

Decreases property values

Disrupts social services

Increases healthcare costs

What the City of St. Louis Can Do For You

The St. Louis Metropolitan Police Department provides:

- Free home security surveys
- Classes for businesses to teach employees how to prevent robbery and how to respond should a break-in occur
- Free Fraud Prevention seminars

Citizen Service Bureau handles many nuisance issues:

- accumulation of trash, weeds
- street maintenance
- traffic control signals and signs
- street lights
- requests for building and health inspections
- stray or vicious dogs

We can provide you and your neighborhood with tools to create a Neighborhood Ownership Plan.

What You Can Do

Check the security of your house and vehicle regularly.

TRUST YOUR INTUITION.
Be aware of your personal surroundings.

Join a Neighborhood Watch Program in your area.

Create or join a Neighborhood Ownership Plan to reduce crime (more info at 314-622-4941)
